L625 CONTINUOUS FOLDER

DESCRIPTION

The **L625** continuous folder delivers fast setups and fold size changeovers. Easy operator controls are an L625 standard. A typical fold size changeover can be accomplished in less than ten minutes with a simple gear change procedure. The 360° 'On the Run' register for the fold perf allows the operator to quickly time the folder to the cross perforation keeping spoilage to a minimum and the Tilt Head adjustment and our fold spiral design provides faster job start-up, and less marking, on jobs with heavier ink coverage. The L625 easily hooks up to a wide variety of web offset and flexographic press equipment via timing belt. For Business Forms and Pressure Sensitive Label printing, the L625 is the most economical and dependable folder available.
